Top Tips for Excellent Care

Your Doctor is always here for you! Our Doctors strive to provide you with EXCELLENT Care, here are a few friendly reminders to receive the best care possible.

- ALWAYS discuss all your prescription medications with your doctor.
- ALWAYS ask for a medication refill before you leave the office.
- ALWAYS talk to your doctor about any other medical appointments you've had since your last visit.
- ALWAYS ask your doctor when you should expect to hear back about your test results.
- ALWAYS ask for assistance if you need further clarification understanding the care instructions your doctor provides.
- ALWAYS ask for assistance if you need help scheduling your next appointment.
- ALWAYS call your doctor or your health plan if you need assistance getting an appointment with a specialist or other care provider.
- ALWAYS make sure your doctor has answered all your questions

Annual Wellness Visit

Have you scheduled your Annual Wellness Visit this year (AWV) with your primary care provider (PCP) to create or update a personalized prevention plan? During your visit, your PCP will develop a personalized prevention plan that will help prevent disease or disability. Your visit may include:

- A risk assessment that may include completing a questionnaire about your health status, injury risks, behavioral risks, and other urgent health needs
- Check your height, weight, blood pressure, and other routine measurements
- Review your functional ability and level of safety
- Go over your medical and family history
- Review your current providers and prescriptions
- A screening schedule for appropriate preventative services
- Advance care planning

Your primary care provider may discover and need to investigate or treat a new or existing problem including a cognitive assessment to look for signs of dementia. Signs of cognitive impairment include trouble remembering, learning new things, concentrating, managing finances, and making everyday decisions about your everyday life. Your visit is covered by Medicare Part B and your deductible does not apply. Call your primary care physician to schedule.

Physical Activity is Essential to Healthy Aging- Let's Get Moving!

Did you know, as an older adult, regular physical activity is one of the most important things you can do for your overall health. Regular physical activity can prevent or delay many of the health problems that seem to come with age. Taking part in physical activity also helps your muscles grow stronger so you can keep doing your day-to-day activities without becoming dependent on others.

Keep in mind, some physical activity is better than none at all. But as with anything, you reap what you sow, and your health benefits will also increase with the more physical activity that you do.

According to the CDC, Adults aged 65 and older need:

- At least **150 minutes a week** (for example, 30 minutes a day, 5 days a week) of **moderate intensity activity** such as brisk walking. Or they need 75 minutes a week of **vigorous-intensity activity** such as hiking, jogging, or running.
- At least **2 days a week** of activities that **strengthen muscles**.
- Activities to **improve balance** such as standing on one foot about 3 days a week.

If chronic conditions affect your ability to meet these recommendations, be as physically active as your abilities and conditions allow. Stay Active- Stay Healthy!

Survey/Reviews Encouragement

We want your feedback. In the business of caring for your health, your trust and satisfaction is of utmost importance. We welcome and encourage your feedback and strive for the highest standard in patient care. If you receive a patient satisfaction survey for a recent visit, please take a few minutes to complete and return that survey. Your feedback is invaluable.
